Install Trusted Certificate

In order to get rid of warnings when performing HTTPS filtering, the Root Certificate that Assure Web Filter uses to generate certificates for filtered HTTPS sites needs to be installed as trusted Root Certification Authority in every connecting browser.

The Assure Web Filter Root Certificate can be downloaded by right clicking on the below link and selecting 'save link as' or 'download linked file as'. After saving, your browser may prompt you with a security warning, please choose the option to ignore the warning and keep the downloaded certificate.

SSL Decryption Certificate

The following screenshots show steps required to install and trust the root certificate for Safari on MacOS.

1. Click on Keychain Access from Launchpad / Other.

Step 1: Open the certificate download page in Safari
