Windows Installation

1 Download the installer

Step 3: Download starts. Click the warning message in Downloads

The screenshot shows a web browser window with the address bar displaying `https://flcr-certs.mymanaged.it`. The page title is "FLCR WiFi Certificate" and the subtitle is "Select your device to get started". On the left, there are four buttons for device selection: "Windows", "macOS", "iPhone / iPad", and "Android". The "Windows" button is selected, and the "Windows Installation" section is active. It contains the text "Required: Use Microsoft Edge browser" and a blue "Download Installer" button with a download icon. Below this, there is a smaller version of the device selection interface with "Windows", "macOS", "iPhone / iPad", and "Android" buttons. A "Downloads" panel is open on the right, showing a warning for the file "install-certificates (4).exe". The warning text reads: "install-certificates (4).exe isn't commonly downloaded. Make sure you trust install-certificates (4).exe before you open it." Below the warning, it says "Make sure you trust install-certificates (4).exe before you open it" and provides details: "Name: install-certificates (4).exe" and "Publisher: Unknown". There are links for "Report this app as safe" and "Learn more". At the bottom of the panel are "Cancel", "Delete", and a three-dot menu button.

Step 4: A security warning appears. Click the ... button next to Delete

Download Installer 

A smaller version of the Windows Installation page is shown as a thumbnail below the main content. It features the same "Download Installer" button and device selection icons for Windows, macOS, iPhone / iPad, and Android.

The Downloads panel shows a warning for the file "install-certificates (4).exe". The warning text reads: "install-certificates (4).exe isn't commonly downloaded. Make sure you trust install-certificates (4).exe before you open it." Below the warning, there is a "Delete" button with a dropdown arrow, and a "Keep anyway" button. Other options include "Cancel", "Report this app as safe", and "Learn more".

Step 5: Click 'Keep anyway' to save the file
